RALFS BATARAGS

A tech guy who creates digital solutions for aviation and blockchain companies.

EMPLOYMENT HISTORY

• Chief Technical Officer | Metria Network 2022

Tech team operations and management, working with team and investors.
Building a blockchain variant that solves security, scalability, and decentralization. Together the team created Metria Network's NFT marketplace and other digital assets.

• Co-Founder CTO | Blockchain Advisory Global 2021 - 2022

Invented the strategy and vision for the bootstrap.
Built a team of business and technical staff.
Lead the necessary tasks for BA Globals' clients and campaigns. Sold my share to another founder in 2022.

• IT Solutions Manager | airBaltic Corporation 2018 - 2021

First hired IT employee after "Loyalty Services" restart, managed 700+ business partner integrations towards Customer Loyalty System with 3+ million registered users in Baltics and Finland and 20+ million customer loyalty transactions per year. Hands-on created automation tools for call center caller data lookup, marketing email creation, automated data jobs, ETL in DWH, created integrations and different inhouse IT solutions. Loyalty Services was sold to airBaltic Corporation and rebranded to airBaltic Club during 2021.

• IT Software and Integrations Specialist | DPD Latvia 2016 - 2018

In collaboration with the team, created a new user experience for the main shipment dispatch web application. On point to business partner needs, created solution architecture for a new merchant API. Integrated 50+ new local business partners into DPD new API. Companies revenue exceeded 1 million euro and has steadily climbed ever since.

• IT Specialist | Individual Freelancer 2014 - 2018

Repaired 1200+ computers, laptops, phones and security camera systems. Worked with 100+ local businesses, sold and installed new hardware units and did remote tech support.
Installed modern security camera systems for grocery stores and live streaming cameras for digital betting operators.
